SUMMARY

Computer and Communications Engineer focused on ERP Systems, software development, and networking. Hands-on experience building a Business Central-inspired ERP project. Strong foundation and understanding of BC Concepts, with experience working collaboratively on software projects and technical teams and a commitment to staying up-to-date with industry trends.

WORK EXPERIENCE

Web Development (ERP Systems) Internship

Software Design Consulting Group (MyDolphin Academy)

07/2024 - 08/2024 Beirut, Lebanon

Software Design Consulting Group (SDCG) specializes in the development and implementation of ERP systems, Media, Retail and Business Intelligence solutions.

Completed a 180-hour practical training focused on ERP Systems, web development, databases, and CRUD ops.

- Worked with SQL database and CRUD operations.
- Developed web apps using C#, JavaScript, AngularJS, HTML, and CSS.
- Practiced API integration and web-based data communication.
- Studied business principles and their relationship to software systems.
- Gained exposure to accounting and inventory processes through Visual Dolphin Accounting & Inventory.
- Developed an understanding of how business operations can be represented and managed through ERP software.

PHP Full-Stack Development Internship

Integrated Digital Systems (IDS)

11/2023 - 01/2024 Beirut, Lebanon

Integrated Digital Systems (IDS) is a software solutions provider delivering full cycle software development services and products since 1991.

Completed a 240-hour practical internship covering backend and frontend web development.

- Developed dynamic web apps using PHP, HTML/CSS, and JS.
- Worked with MySQL databases and CRUD operations.
- Applied PHP Object-Oriented Programming concepts.
- Developed and integrated REST APIs.
- Participated in code reviews, teamwork, and project management activities.
- Integrated frontend interfaces with backend functionality.

ERP & Business Processes

ERP Systems	MS Dynamics 365 Business Central Concept	Sales & Purchasing Processes	Inventory Management
Order Fulfillment & Shortage Handling	Fit-Gap Analysis	UAT	

Programming & Web Development:

C#	ASP.NET Core	HTML	CSS	JavaScript	REST APIs	JSON	PHP	Python	AngularJS
----	--------------	------	-----	------------	-----------	------	-----	--------	-----------

Databases & Data - Networking - Tools:

Microsoft SQL Server	Entity Framework Core	SQL CRUD Operations	Database Design	TCP/IP	Routing & Switching
Network Troubleshooting	Cisco	GitHub	Postman	Microsoft Office	

PROJECTS & CERTIFICATES

Business Central-Inspired Mini ERP

📅 2026 📍 Beirut, Lebanon

Full-Stack ERP Project | C#, ASP.NET Core, SQL Server, Entity Framework COre, REST API, and JavaScript

- Built a standalone ERP application inspired by Microsoft Dynamics 365 Business Central Process.
- Designed and implemented customer, vendor, product, inventory, sales order, purchase order, and order line functionality.
- Developed an SQL Server database with related tables, foreign keys, composite keys, and inventory transaction tracking.
- Built REST API endpoints using ASP.NET Core and Entity Framework Core for CRUD operations and ERP workflows.
- Implemented sales order processing with stock availability checks, partial fulfillment, shortage calculation, and remaining quantity fulfillment.
- Implemented purchase order workflows to cover product shortages, receiving, inventory updates, and fulfillment of remaining sales quantities.
- Connected the frontend dashboard to the backend API using JS, fetch(), and JSON.
- Tested end-to-end ERP scenarios using Postman and the web dashboard.
- Applied Business Central concepts including posting, inventory movement, item/vendor/customer terminology, Fit-Gap thinking, and UAT.
- Documented the architecture and mapped the project's custom ERP structures to corresponding Business Central concepts.
- **Architecture: HTML/CSS → JS → ASP.NET Core REST API → Entity Framework Core → SQL Server.**

1-Integrated Digital Systems (IDS) Training Certificate & Activity Web Project

2-MyDolphin Academy Certificate

📍 Beirut, Lebanon

Training in:

- SQL Database, Web Development, API Integration, Visual Dolphin Accounting & Inventory.
- PHP-OOP, SQL Database, Web Development.
